Photography Check List

Successful anterior cases are based on good communication between the Dentist and the Laboratory.

This picture list focuses on the consistency of photographic views required for a successful anterior case.

The type and quality of the camera is not important. What is very important is taking all the photos as shown on this photo guide.

Please follow this guide as well as our Esthetic Checklist printed on our lab slips when submitting your next case.

Pre-op full face

Pre-op smile

Pr-op with desired shade

Preps

Frontal view provisionals

April 2004

Right lateral provisionals
